BEAM PATTERNS

FLOOD LIGHT
The flood beam is an excellent work light which illuminates wide and short areas, giving great medium range visibility.

SPOT LIGHT
The spot beam is a long-range light for marking rows, fence lines, etc.

TRAPEZOIDAL
The trapezoidal beam is an ideal, general purpose work light designed with a narrower pattern for longer visibility.

BENEFITS OF HY-CAP LED

• BRIGHTER, WHITER LED lights produce a crisp, bright white light—the closest to real daylight of any artificial light sources. Beam pattern covers more area than traditional lights.

• LONGER-LASTING The solid-state construction of LED lights eliminates fragile bulbs, filaments or electrodes—perfect for the harsh conditions your equipment faces.

• LOWEST COST OF OWNERSHIP LED lights far outlast incandescent, halogen and HID lights, saving you money and time over the life of your machine.

• VERSATILITY AND EASY INSTALLATION Many LED lights from Hy-Capacity feature easy, bolt-on installation—simply attach them and wire them up.

• LESS POWER/AMPS LED lights use fewer amps than alternative lamp types, making them ideal for older equipment and contributing to enhanced productivity for any machine.
