TRACTOR SUPPLY LTD.

HOW TO: GATHER SERIAL NUMBERS

CALL IN WITH AS MUCH INFORMATION AS POSSIBLE

Most times, when looking for parts, there is a requirement for model numbers, serial numbers and/or casting numbers. Without this information, it can be difficult to locate the correct parts for your application. Here are some helpful hints for finding this information. ⬇

For engine parts, you may need an engine serial number; located on the engine tag, usually attached to the block.

For transmission parts, look for the transmission serial tag, attached to the transmission housing.

Tractor and Cab serial numbers can be necessary for locating the correct parts for all other components of your machine.

Casting numbers of housing pieces are also helpful for applications such as transmission and front wheel drive parts. If you are unaware of where to look for these numbers, check your tractor manual or give us a call and we would be more than happy to assist you.
